**Note:** Improvements are always being made to Gold Medal's equipment. This information may not be the latest available for your purposes. It is critical that you call Gold Medal's Technical Service Department at 1-800-543-0862 for any questions about your machine operations, replacement parts, or any service questions. (Gold Medal Products Co. does not assume any liability for injury due to careless handling and/or reckless operation of this equipment.)

# INSTALLATION INSTRUCTIONS

## Inspection of Shipment

After unpacking, check thoroughly for any damage which may have occurred in transit. Claims should be filed immediately with the transportation company. The warranty does not cover damage that occurs in transit, or damage caused by abuse, or consequential damage due to the operation of this machine, since it is beyond our control (reference warranty in back of manual).

## Manual

Read and understand the operator's manual and all other safety instructions before using this equipment. To order copies of the operator's manual go to [gmpopcorn.com](http://gmpopcorn.com) or write to Gold Medal Products Co., 10700 Medallion Drive, Cincinnati, OH 45241 USA 1-(800)-543-0862.

## Setup

This unit has been tested at the factory.

1. Remove all packaging and tape prior to operation.
2. Place unit on a sturdy, level base which can withstand accidental dripping of water and ice.
3. Locate the pusher handle (packed in a separate box). Connect the pusher handle to the shaver body using the bolt and nut provided.
4. Connect the drain hose (provided with unit) to funnel excess water to floor drain or basin tub. Drained water is not intended for human consumption.
5. After setup, the unit should be cleaned prior to use (see Care and Cleaning section of this manual).

**Note:** The door kit is not included with 1203. Order model 1215 for door kit. Model 1203D includes the door pre-installed.

## Electrical Requirements

The following power supply must be provided:

**1203, 1203D:** 120 V~, 972 W, 60 Hz

	 <b>DANGER</b>
	<p>Machine must be properly grounded to prevent electrical shock to personnel. Failure to do so could result in serious injury, or death.</p> <p>DO NOT immerse any part of this equipment in water.</p> <p>DO NOT use excessive water when cleaning.</p> <p>Keep cord and plug off the ground and away from moisture.</p> <p>Always unplug the equipment before cleaning or servicing.</p> <p>Make sure all machine switches are in the OFF position before plugging the equipment into the receptacle.</p> <p style="text-align: right; font-size: small;">008_051514</p>

A certified electrician must furnish sufficient power for proper machine operation and install any supplied receptacle. We recommend this equipment be on a dedicated and protected circuit. Failure to wire properly will void the warranty and may result in damage to the machine. It is Gold Medal Products Co.'s recommendation that this machine be plugged directly into a wall outlet. The use of extension cords is not recommended due to safety concerns, and may cause sacrificed and/or reduced performance. Make sure cord is located to prevent a trip hazard or unit upset.

## Before You Plug In Machine

1. Make sure all machine switches are in the OFF position before plugging the equipment into the receptacle.
2. Make sure the wall outlet can accept the grounded plugs (where applicable) on the power supply cord.
3. The wall outlet must have the proper polarity. If in doubt, have a competent electrician inspect the outlet and correct if necessary.
4. **DO NOT** use a grounded to un-grounded receptacle adapter (where applicable).
5. Install the unit in a level position.

	 <b>CAUTION</b>
	<p>If the supply cord is damaged, it must be replaced by Gold Medal Products Co., its service agent or similarly qualified persons in order to avoid a hazard.</p> <p style="text-align: right; font-size: small;">039_080614</p>

# OPERATING INSTRUCTIONS

## Ice Requirements

The Shav A Doo can take ice cubes small or medium in size. If using a block of ice, break into pieces approximately 2 to 3 inches in size. The ice will not enter the shaving chute if the pieces are too large

**Note:** Harder ice will result in finer snow; while soft ice will result in coarser snow.

## Shav A Doo Operation

1. Fill the hopper to within an inch of the top with ice cubes (no larger than 3" to 4").  
Softened ice makes better snow and prolongs blade life.
2. Toggle the POWER switch to the ON position.
3. While pushing the MOMENTARY switch, apply downward pressure to the pusher handle. Apply firm and even pressure to make the best snow. Practice will allow you to gauge when to stop pressing. This allows the ice to resettle against the shaver head. Too much pressure will result in snow that is coarse; too little pressure will make the snow mushy.

**Note:** Never allow any foreign or metallic objects around the shaver area. Ice picks, scoops, and debris in the ice will damage blades.

## Care and Cleaning

	<b>⚠ DANGER</b>
	Machine must be properly grounded to prevent electrical shock to personnel. <b>DO NOT immerse in water.</b> Always unplug the equipment before cleaning or servicing. <small>025_020314</small>

	<b>⚠</b>
	This machinery contains sharp blades. Keep hands and body parts clear at all times. <small>037_103114</small>

Good sanitation practice demands that all food preparation equipment be cleaned regularly (only use non-toxic, food grade cleaners). A clean looking, well-kept machine is one of the best ways of advertising your product.

Follow the directions below to clean and sanitize the unit after each day of use.

1. With the machine OFF, unplug the unit before attempting to clean.
2. Empty water from pans and clean using appropriate cleaners for the type of machine; review all manufacturer's instructions and warnings on cleaning product prior to use.

**DO NOT** use oven cleaners or abrasive materials as they will damage parts of the machine.

**DO NOT** use Ammonia cleaners, they will damage plastic panels.
