

The world's leading association for rental, the American Rental Association, developed the **Clean. Safe. Essential.** program to elevate the industry's response to the COVID-19 pandemic.

By completing this program, our rental business has received the knowledge necessary to keep you safe. Our staff has been trained on operational processes to address COVID-19 concerns, we have received tools to create a safe and clean working environment and we have the education necessary to execute a risk mitigation plan. As we move forward, keeping employees and customers safe is our primary concern, and being recognized by the ARA helps us to achieve this. Please reach out if you have any questions regarding how we are keeping our rental equipment and operation Clean. Safe. and Essential.
